BA is a group formed to create sound arts, sound installations and audiovisual performances. During our performances we transform the space what is at our disposal, we modify the visuals by rearranging and staging the space to create unity with music. Our intention is to realize a living site-specific sound-installation, an experimental performance, an organic environment, which is musically improvised and constantly shows a new feature for the spectator.

Members: Blazsek András / Kiss Máté / Kovács Imrich / Nagy Gergő / Pethő Zoltán / Zérczi Attila
